SUMMARY

Versatile and detail-oriented full-stack web developer with extensive experience in grocery retail management. Demonstrated success leveraging strong customer service, problem-solving, and team leadership skills. Proficient in developing responsive, user-centered web and mobile applications utilizing modern technologies.

SKILLS

Experience creating full-stack applications using JavaScript, TypeScript and Python Frameworks.
Skilled in software development best practices, optimizing performance, API development
Proficient with VSCode, Git/GitHub, Agile development methodologies with tools like Jira/Trello.
Proven ability to analyze challenges, collaborate with technical discussions, provide developer documentation

PROJECTS

Chat App | Mobile App Development

August 2024 – September 2024

- Developed a real-time React Native chat app using Expo, with Gifted Chat, Firebase, and Firestore.
- Ensured offline functionality with data caching, leveraged native device features, and monitored performance of real-time updates.
- Demonstrated proficiency in cloud storage, privacy (GDPR compliance protocols), and emulators.

Recipe App | Web Development and Django

November 2024 – February 2025

- Built a full-stack recipe management app with Django, SQLite, PostgreSQL, and Heroku.
- Created database models, views, and set url patterns for templates to display data.
- Implemented authentication, CRUD operations, and search functionality.
- Integrated Cloudinary for image storage and Matplotlib for data visualization.
- Demonstrated proficiency designing secure and functional user-friendly interfaces.

Meet App | Testing in Development

July 2024 – August 2024

- Built a React.Js client that connects to a secure API using OAuth and AWS Lambda.
- Conducted unit, integration, and end-to-end testing with Jest and Puppeteer.
- Optimized offline usability with service workers and visualized data with Recharts library.
- Demonstrated proficiency in serverless architecture and automated testing tools.

MovieMax Clients & API | Server and Client-Side Programming

May 2024 – October 2024

- Designed a RESTful API with Express/Node.Js for movie and user data using MySQL and MongoDB.
- Built responsive clients in React (React Query, Router, Bootstrap, Axios), Angular (Angular Material).
- Deployed clients to GitHub Pages/Netlify and server to Heroku.
- Demonstrated proficiency in JWT-based authentication, state management, directives, routing, and API integration.

EDUCATION

CareerFoundry Full-Stack Web Development Program

Remote • Berlin, Germany • 2025

- Full-Stack Web Development, Python for Web Developers (Completed: Feb 7, 2025)
- Full-Stack Immersion (Completed: Oct 20, 2024)
- Intro to Frontend Development (Completed: Mar 25, 2024)
